CAPABILITIES

- PROTOTYPING
- INTERACTION DESIGN
- WIREFRAMING
- GRAPHIC DESIGN
- HTML / CSS
- 3D ART / CAD
- ACCESSIBILITY
- AI-ACCELERATED WORKFLOW

TOOLKIT 04

Figma	DESIGN · PROTO
Framer	INTERACTION
Blender / CAD	3D · MODELLING
Photoshop	VISUAL

METHODS

- Agile methodology
- Lean UX
- User research & usability testing
- Design systems

EDUCATION

Thai-Nichi Institute of Technology

B.Eng — Digital Engineering

Bangkok, TH · 2020 — 2024

- † Studied **Machine Learning** and algorithms as part of the Digital Engineering curriculum.
- † Recognised for excellence in UX/UI web design (HTML & CSS) within the **Human-Computer Interaction** program.
- † Awarded in a competitive **3D design contest** — creativity, technical depth, problem-solving.

Rosehill College

High School Diploma — Digital Arts

Auckland, NZ · 2017 — 2019

- † Earned two **Art & Design excellence** awards.

LANGUAGES

Thai	NATIVE
English	PROFESSIONAL

CURRENTLY

Open to **product design** roles — full-time or contract. Bangkok-based, happily remote.

I came to UX by way of 3D and digital engineering — I think in **systems**, sweat the details, and fold AI into my process to spend less time on busywork and more on the actual design work.

WORK EXPERIENCE

03

01 Freelance & Commission

Application & UX Designer · Independent

Mar 2023 — Present

- Took full ownership of web and mobile products — from initial concepts through to final handoff.
- Moved quickly from sketch to working prototype, using Figma, Photoshop, or Sketch depending on the project's needs.
- Built accessible, responsive layouts by default — not as an afterthought.

02 Applicad Public Co., Ltd.

3D & General Designer · Internship

Jun 2023 — May 2024

- Created precise 3D prototypes daily, applying spatial thinking developed in 3D work to interaction design.
- Translated complex technical concepts into clear visuals for clients during in-person discussions.
- Optimised 3D-printing workflows until they ran efficiently; this iterative approach carried directly into my UX process.

03 G.O. SG Consulting Pte. Ltd.

UX/UI Designer

2025 — 2026

- Redesigned an SME client's website around the SEO team's content strategy, and its click-through rate climbed.
- Owned client websites and landing pages from start to finish — from wireframes to developer handoff.
- Maintained a design system for each client, so visuals stayed consistent and there was less rework across projects.
- Wove AI tools into the daily workflow — ideation, copy variants, research digests — so more of my time went to design.

SELECTED PROJECTS

04

01	Montana Moment	User flows, wireframes, and visual storytelling in a web case study.	FIGMA · WEB · PROTO
02	FoodExpress	Android food-delivery app with flows made for quick, one-handed ordering.	UX/UI · MOBILE · ANDROID
